Environment for Higher Research

One of the main aims of academic and administrative setup of Abhedananda Mahavidyalaya, Sainthia is to keep challenging the horizon of knowledge through intense, rigorous and continuous higher research. Although situated in a remote corner of West Bengal, Abhedananda Mahavidyalaya in the last five academic years has shown extraordinary progress in the field of higher research. Teachers of different disciplines have been encouraged and assisted to carry out research programmes in their respective topics. The college recognizes the value and importance of their higher research hence it helps them by making necessary arrangements to expedite the research process and supports them with necessary infrastructure. In the last five years teachers of Abhedananda Mahavidyalaya are engaged in no less than nine minor research projects and two major research projects. Funds have mostly come from the UGC and the DST for these projects. This surely is a mark of progress and the college is determined to advance further in the coming future.

The college also encourages and helps teachers who are doing their researches in individual capacity.

All these steps are taken with a view to advance the strategic plan of Abhedananda Mahavidyalaya to promote a culture of higher research in the college. The college has achieved satisfactory results in this regard until now. However, there is always a scope for further advancement and we are in a continuous process to revise and consolidate on what we have already done and achieved.

Research Committee of Abhedananda Mahavidyalaya, with the help of the Teacher-in-Charge, works relentlessly to improve upon the present situation and remove any impediment in this regard.

Strategic Plan

- Increasing the participatory nature of both academic and administrative functions of the college.
- Achieve higher level of competence in Online Admission Process by making it all the more student friendly and easier, such as the introduction of App, easier payment methodology, and so on.
- Increasing the scope for more innovations to make teaching-learning experience attractive.
- Purchase of up-to-date and relevant books and journals for newly introduced CBCS courses.
- Introduction of easier and open online access to college Library for the students and teachers.
- Facilitate and encourage departments to have their own libraries.
- Organising seminars, workshops at a more regular interval.
- Encourage Teachers in their higher research.
- Gradual emphasis on the introduction of renewable energies for the power consumption of the institution.
